

24/7 Operability for XD3200U, WD3300U and XD3500U

Through extensive engineering and testing, Mitsubishi can confirm the XD3200U, WD3300U and XD3500U can be operated 24 hours a day, 7 days a week. Engineered to the highest standard, Mitsubishi is confident that these DLP® models offer the perfect solution for full system integration where a long life performance is required.

However, for better performance we highly recommend to turn off the projector for at least one hour a week.

The regular Terms of Guarantee for Mitsubishi Projectors apply on the above mentioned models.
